STUDIES IN HISTORY & PHILOSOPHY OF SCIENCE

Editor: NICHOLAS JARDINE, *Department of History & Philosophy of Science, University of Cambridge, Free School Lane, Cambridge CB2 3RH, UK*
Associate Editor: ANDREW CUNNINGHAM, *Wellcome Lecturer in the History of Medicine, Department of History and Philosophy of Science, University of Cambridge, Cambridge, UK*
Senior Consulting Editor: GERD BUCHDAHL, *Department of History & Philosophy of Science, University of Cambridge, Free School Lane, Cambridge, UK*

Studies in History & Philosophy of Science is essential reading for students and teachers concerned with the historical, social and intellectual contexts of the sciences and with their methodology and epistemology.

The journal particularly encourages studies which integrate philosophical, historical and sociological considerations. Its orientation is international, with contributions from a wide range of cultural perspectives.

The papers published are of the highest scholarly quality. Since the journal's inception it has proved an invaluable source both for reflective scientists and for workers in the history, philosophy and sociology of science. Relevant papers are welcome for editorial consideration.

A Selection of Papers
S FORGAN (UK), The architecture of science and the idea of a university.
M BIAGIOLI (USA), The anthropology of incommensurability.
J D COLLIER (Canada), Two faces of Maxwell's Demon reveal the nature of irreversibility.
Y BEN-MENAHEM (Israel), Struggling with causality: Schrödinger's case.
B LATOUR (France), Postmodern? No, simply amodern! Steps towards an anthropology of science.
B BROWN (Canada), How to be realistic about inconsistency in science.
A MALET (USA), Keplerian illusions: geometrical pictures vs optical images in Kepler's visual theory.

Vol 21, 1970 - Vol 40, 1989

AUTHOR INDEX

Ackermann, R. (1989) The New Experimentalism (review of Allan Franklin *The Neglect of Experiment*), **40**, 185
Adams, E.W. and Adams, W.Y. (1987) Purpose and Scientific Concept Formation, **38**, 419
Agassi, J. (1978) Williams Dodges Agassi's Criticism, **29**, 248
Akeroyd, F.M. (1986) A Challenge to the Followers of Lakatos, **37**, 359
Akeroyd, F.M. (1988) Research Programmes and Empirical Results, **39**, 51
Ariew, R. (1984) The Duhem Thesis, **35**, 313
Aronson, J.L. (1989) Testing for Convergent Realism, **40**, 255

Baillie, P. (1971) Confirmation and Probability: A Reply to Settle, **22**, 285
Baillie, P. (1973) Confirmation and the Dutch Book Argument, **24**, 393
Baird, D. (1987) Explanatory Factor Analysis, Instruments and the Logic of Discovery, **38**, 319
Baird, D. (1983) The Fisher/Pearson Chi-Squared Controversy: A Turning Point for Inductive Inference, **34**, 105
Balzer, W. and Dawe, C.M. (1986) Structure and Comparison of Genetic Theories: (1) Classical Genetics, **37**, 55
Balzer, W. and Dawe, C.M. (1986) Structure and Comparison of Genetic Theories: (2) The Reduction of Character-Factor Genetics to Molecular Genetics, **37**, 177
Bar-Hillel, M. (with Margalit, A.) (1972) Newcomb's Paradox Revisited, **23**, 295
Barbosa De Oliveira, M. (1985) The Problem of Induction: A New Approach, **36**, 129
Barbour, J.B. (1982) Relational Concepts of Space and Time, **33**, 251
Barnard, G.A. (1972) Two Points in the Theory of Statistical Inference, **23**, 329
Barnard, G.A. (1972) The Logic of Statistical Inference (review of R. Harre *The Principles of Scientific Thinking*), **23**, 123
Batens, D. (1971) Some Objections to Keith Lehrer's Rule IR, **22**, 357
Beausoleil, J-R. (1989) The Metamathematics-Popperian Epistomology Connection and its Relation to the Logic of Turing's Programme, **40**, 307
Bell, J. (1979) The Infinite Past Regained: A Reply to Whitrow, **30**, 161
Bell, J.L. (1981) Category Theory and the Foundations of Mathematics,**32**, 349
Bell, J.L. (1986) A New Approach to Quantum Logic, **37**, 83
Beloff, J. (1978) Is Mind Autonomous? (review of K.R. Popper and J.C. Eccles *The Self and Its Brain*), **29**, 265
Ben-Zeev, A. (1984) The Passivity Assumption of the Sensation-Perception Distinction, **35**, 327
Benditt, T.M (with Ross, D.) (1976) Newcomb's "Paradox", **27**, 161
Berkson, W. (1978) Reply to L. Pearce Williams, **29**, 243
Bhave, S.V. (1986) Separable Hidden Variable Theory to Explain the Einstein-Podolsky-Rosen Paradox, **37**, 467
Bicchieri, C. (1987) Rationality and Predictability in Economics, **38**, 501
Bigelow, J. and Pargetter, R. (1989) Vectors and Change, **40**, 289
Blackmore, J. (1979) On the Inverted Use of the Terms "Realism" and "Idealism" Among Scientists and Historians of Science, **30**, 124
Blackmore, J. (1978) Is Planck's "Principle" True?, **29**, 347
Blackmore, J. (1985) An Historical Note on Ernst Mach, **36**, 299
Blackmore, J. (1989) Ernst Mach Leaves "The Church of Physics", **40**, 519
Bloor, D. (1970) Is the Official Theory of Mind Absurd?, **21**, 167
Blum, A. (1970) Laws and Instantial Statements, **21**, 371
Blum, A. (1989) An Anomaly in the D-N Model of Explanation, **40**, 365
Boden, M. (1973) How Artificial is Artificial Intelligence? (review of F.J. Crosson (ed.) *Human and Artificial Intelligence*, B. Metzer and D. Michie (eds.) *Machine Intelligence 5* and *6*), **24**, 61
Bogen, J. (1977) Further Discussion on Split-Brains and Hemispheric Capabilities, **28**, 281
Boland, L.A. (1983) On the Best Strategy for doing Philosophy of Economics (review of Daniel M. Hausman *Capital, Profits and Prices an Essay in the Philosophy of Economics*), **34**, 387
Bradie, M. (1976) On Writing Popperian History, **27**, 398
Braithwaite, R.B (1970) Bertrand Russell as Philosopher of Science, **21**, 129

Brink, C. and Heidema, J. (1987) A Verisimiliar Ordering of Theories Phrased in a Propositional Language, **38**, 533
Briskman, L (1982) From Logic to Logics (and Back Again) (review of Susan Haack *Deviant Logics*), **33**, 77
Bub, J. (1973) Under the Spell of Bohr (review of Ted Bastin (ed.) *Quantum Theory and Beyond*), **24**, 78
Bub, J. (1979) Some Reflections on Quantum Logic and Schrodinger's Cat, **30**, 27
Bub, J. (1989) The Philosophy of Quantum Mechanics (review of P. Gibbins *Particles and Paradoxes: The Limits of Quantum Logic*, H. Krips *The Metaphysics of Quantum Theory* and M. Redhead *Incompleteness, Nonlocality and Realism: A Prolegomenon to the Philosophy of Quantum Mechanics*), **40**, 191
Buchdahl, G. (1972) Hegel's Philosophy of Nature (review of G.W.F. Hegel *Philosophy of Nature*), **23**, 257
Butterfield, J. (1984) Relationism and Possible Worlds, **35**, 101
Butterfield, J. (1989) The Hole Truth, **40**, 1
Buxton, R. (1978) The Interpretation and Justification of the Subjective Bayesian Approach to Statistical Inference, **29**, 25

Cambell, Richmond and Vinci, Thomas (1983) Novel Confirmation, **34**, 315
Cargile, J. (1975) Newcomb's Paradox, **26**, 234
Carloye, J.C. (1985) Normal Science and the Extension of Theories, **36**, 241
Chalmers, A. (1970) Curie's Principle, **21**, 133
Chalmers, A. (1973) On Learning from our Mistakes, **24**, 164
Chalmers, A. (1979) Towards an Objectivist Account of Theory Change, **30**, 227
Chalmers, A. (1981) Planetary Distances in Copernican Theory, **32**, 374
Chalmers, A. (1983) Planetary Distances and Copernican Theory: A Reply, **34**, 372
Chalmers, A. (1985) Galileo's Telescopic Observations of Venus and Mars, **36**, 175
Chambers, A. (1989) How to Defend Science Against Scepticism: A Reply to Barry Gower, **40**, 249
Chihara, C.S. (1987) Some Problems for Bayesian Confirmation Theory, **38**, 551
Christensen, F. (1977) How to Establish Non-Conventional Isochrony, **28**, 49
Christensen, I . (1981) Special Relativity and Space-Like Time, **32**, 37
Clark, P. (1976) Elkana on Helmholz and the Conservation of Energy (review of Y. Elkana *The Discovery of the Conservation of Energy*), **27**, 165
Clark, P. (1982) Matter, Motion and Irreversibility (review of S.G. Brush *The Kind of Motion We Call Heat*), **33**, 165
Clarke, J.J. (1972) Turing Machines and the Mind-Body Problem, **23**, 1
Cleave, J.P. (1970) The Notion of Validity in Logical Systems with Inexact Predicates, **21**, 269
Cleave, J.P. (1971) Cauchy, Convergence and Continuity, **22**, 27
Cleave, J.P. (1979) The Concept of "Variable" in Nineteenth Century Analysis, **30**, 165
Coats, A.W. (1974) Situational Determinism in Economics: The Implications of Latsis's Argument for the Historian of Economics, **25**, 285
Coddington, A. (1975) Creaking Semaphore and Beyond (review of G.L.S. Shackle *Epistemics and Economics*), **26**, 151
Cohen, B. (with E.H. Madden) (1973) Harre and Non-Logical Necessity, **24**, 176

Cambridge

F. P. Ramsey: Philosophical Papers

Edited by **D. H. MELLOR**

Frank Ramsey was arguably the greatest of the remarkable generation of Cambridge philosophers and logicians which included Bertrand Russell, and Ludwig Wittgenstein. This volume, with a new and extensive introduction by D. H. Mellor, contains all Ramsey's previously published writings on philosophy and the foundations of mathematics.

Michel Foucault's Archaeology of Scientific Reason

GARY GUTTING

This book is an important introduction to and critical interpretation of the work of the major French thinker, Michel Foucault. Professor Gutting provides a lucid exposition of Foucault's 'archaeological' approach to the history of thought, a method for uncovering the 'unconscious' structures that set boundaries on the thinking of a given epoch.

Modern European Philosophy

Romanticism and the Sciences

Edited by **ANDREW CUNNINGHAM** and **NICHOLAS JARDINE**

While the Romantic period has attracted a great deal of interest in recent times, there has been no general work since 1941 on the relationship between Romanticism and the sciences. This new book presents a series of essays which focus on the role of the Romantic philosophy and ideology in the sciences, and on the role of the sciences in Romantic literature.

Demystifying Mentalities

G. E. R. LLOYD

Professor Lloyd rejects the notion of distinct mentalities so often used to explain cultural diversities. Discussing apparently irrational beliefs and behaviour, such as magic, he shows how different forms of thought can coexist in a single culture.

The Philosophy of Quantum Mechanics

RICHARD A. HEALEY

This is one of the most important books on quantum mechanics to have appeared in recent years. It offers a dramatically new interpretation of quantum mechanics which resolves puzzles and paradoxes associated with the measurement problem and the behaviour of coupled systems.

£22.50 net HB 0 521 37105 8 284 pp.

Computability and Logic

Third Edition

GEORGE S. BOOLOS and **RICHARD C. JEFFREY**

A text for second course in logic for graduate and advanced undergraduate students. This third edition has been corrected and contains thoroughly revised versions of the chapters on Ramsey and provability, with new exercises provided for three other chapters.

£35.00 net HB 0 521 38026 X 316 pp.
£12.95 net PB 0 521 38923 2

Systems of Logic

NORMAN M. MARTIN

This is an advanced study of systems of propositional logic which offers a comprehensive account of a wide variety of logical systems and which encourages students to take a critical stance on the subject.

£27.50 net HB 0 521 36589 9 334 pp.

Theory Construction and Selection in Modern Physics: The S-Matrix Theory

J. T. CUSHING

The S-Matrix programme was introduced to deal with difficulties encountered in quantum field theories in describing particular phenomena. The author explains how a viable theory fell out of favour and concludes with a critique of different methodologies in the history of science.

Cognitive Foundations of Natural History

Towards an Anthropology of Science

SCOTT ATRAN

'Only Atran could have written a book that combines deep understanding of anthropology, biological systematics, the history of science, and philosophy. The result is a book that contains more substance per page than any book I have read in a generation.'

David L. Hull, Northwestern University

£35.00 net HB 0 521 37293 3 360 pp.

Co-publication with Maison des Sciences de l'Homme

Mind, Body and Culture

Anthropology and the Biological Interface

GEOFFREY SAMUEL

Are 'culture', 'society' and similar concepts of any real use in making sense of human social life? Dr Samuel uses a scientific approach to reassess concepts often taken for granted and develops a multimodal framework with which to analyse ethnographic material.

£25.00 net HB 0 521 37411 1 216 pp.

The Taming of Chance

IAN HACKING

Combining detailed scientific historical research with characteristic philosophic breadth and verve, Hacking provides a unique analysis of the 'probilisation' of the Western world.

£27.50 net HB 0 521 38014 6 280 pp.
£9.95 net PB 0 521 38884 8

Ideas in Context

Experiment Right or Wrong

ALLAN FRANKLIN

The author combines case studies and readings to investigate the history and philosophy of experiments. He addresses the importance of experiments in confirming or refuting theories and hypotheses, and question how we come to believe reasonably in experimental results.

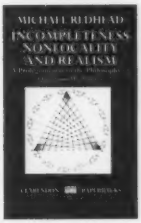
Pathbreaking Books and Leading Writers

MICHAEL REDHEAD

Incompleteness, Nonlocality, and Realism

A Prolegomenon to the Philosophy of Quantum Mechanics



● **Winner of the 1988 Lakatos Award for an Outstanding Contribution to the Philosophy of Science**

'Michael Redhead has given us a fine, hard book that stands head and shoulders above the usual crop.' **Canadian Philosophical Review**

'a paradigm of the new philosophy of physics . . . long-awaited, authoritative and splendid book' **Philosophical Books**

0 19 824238 7, 200 pages,
Clarendon Paperbacks £9.95 1989

BAS C. VAN FRAASSEN

● **Laws and Symmetry**

'the real excitement and power of the book comes from the new perspective it brings' **Times Higher Education Supplement**

0 19 824811 3 £35.00 1989
0 19 824860 1 £11.95 1989

● **The Scientific Image**

0 19 824427 4 £10.95 1980

● **Quantum Mechanics**

An Empiricist View

0 19 824861 X Forthcoming in 1991

NANCY CARTWRIGHT

Nature's Capacities and their Measurement

'an interesting and original contribution to the realist argument' **Times Higher Education Supplement**

0 19 824477 0, 278 pages, figures throughout,
Clarendon Press £27.50 1989

SIMON SAUNDERS and HARVEY R. BROWN (Eds)

The Philosophy of Vacuum

What is the vacuum concept, and why is it so important? This collection enlarges on these issues in the context of classical gravity, quantum electrodynamics, and the grand unification programme. It includes an essay by **Sir Roger Penrose** and a hitherto untranslated paper by **Albert Einstein.**

0 19 824449 5, 288 pages, 20 figures,
Clarendon Press £30.00
April 1991

MARGARET A. BODEN

The Philosophy of Artificial Intelligence

Is 'artificial intelligence' a contradiction in terms? These classical and contemporary readings provide a clearly signposted pathway into hotly disputed philosophical issues at the heart of the question. Contributors include: **Alan Turing, Daniel Dennett,** and **Paul Churchland.**

Oxford Readings in Philosophy

0 19 824855 5, 460 pages £30.00
0 19 824854 7, paper covers £9.95
1990

K. A. MOHYELDIN SAID, W. H. NEWTON-SMITH, R. VIALE, and K. V. WILKES (Eds)

Modelling the Mind

These papers by distinguished philosophers, psychologists, and physiologists provide an interdisciplinary approach to the central question of cognitive science: how do we model the mind? Contributors include: **Margaret Boden, Donald Davidson, Daniel Dennett,** and **P. N. Johnson-Laird.**

0 19 824973 X, 224 pages,
Clarendon Press £25.00

THE BRITISH SOCIETY FOR THE PHILOSOPHY OF SCIENCE

The British Journal for the Philosophy of Science is the official organ of the Society, whose purpose is described by the following statement from its Constitution and Rules:

The purpose of the Society is to study the logic, the method and the philosophy of science as well as those of the various special sciences, including the social sciences.

The Society holds meetings, at which papers are read and discussed, once a month during the academic year. These meetings are free and are open to both members and the general public. The Society also holds one day conferences on special topics and an annual conference. The dates times and topics of these meetings are announced in the Journal.

Membership of the Society, which is open to all interested persons on payment of an annual subscription, is international and by no means confined to people resident in the United Kingdom. Members receive the programme of meetings and conferences and are entitled to vote at general meetings of the Society. They also receive a discount on the subscription to the Journal. There is a reduced subscription for student members. Those wishing to join should write to the Membership Secretary, whose address is given in current copies of the Journal.
